# Andrew Estornell

PhD Student · Computer Science

*Washington University in Saint Louis*

aestornell at wustl dot edu | andrewestornell.github.io

## Research Interests

My research interests fall broadly within the fields of Machine Learning, Optimization, Game Theory, Strategic Classification, and Algorithmic Fairness. In particular, I enjoy working on computational problems which involve competitive (or cooperative) behavior between strategic agents. Recently my work has focused on Strategic Classification and Algorithmic Fairness with an emphasis on how these two fields relate to one another.

## Education

**Washington University in Saint Louis** — *Saint Louis Missouri*

PhD in Computer Science — *Aug 2018 - present*

- Advisor: Yevgeniy Vorobeychik
- Advisor: Sanmay Das

**Temple University** — *Philadelphia PA*

BS in Mathematics — *Aug 2015 - May 2018*

## Research Experience

**Washington University in St Louis - Dept of Computer Science** — *St Louis, MO*

Advisors: Yevgeniy Vorobeychik, Sanmay Das — *Aug 2018 - Present*

- PhD dissertation (ongoing): "Consequences and incentives of group-fair learning."

**Temple University - Dept of Computer Science** — *Philadelphia, PA*

Advisor: Kai Zhang — *Jan 2018- Jun 2018*

- Undergraduate research: "Early diagnosis of neurological disorders via patient EEG data."

**Temple University - Dept of Mathematics** — *Philadelphia, PA*

Advisor: Chelsea Walton — *May 2017 - Jun 2018*

- Undergraduate research: "Explicit classification of PBW deformations of quadratic monomial algebras."

## Publications

## Awards

2022 **Best paper (LSA):**, "Unfairness Despite Awareness: Group-Fair Classification with Strategic Agents."

## Presentations

### Contributed Presentations

Presented "Manipulating Elections by Changing Voter Perceptions" at IJCAI 2022

Presented "Unfairness Despite Awareness: Group-Fair Classification with Strategic Agents" at LSA (AAMAS workshop) 2022, and at StratML (NeurIPS workshop) 2021.

Presented "Incentivizing Truthfulness Through Audits in Strategic Classification" at AAAI, 2021.

Presented "Election Control by Manipulating Issue Significance" at UAI 2020.

Presented "Deception Through Half-Truths" at AAAI 2020.

## Teaching Experience

Spring 2022 **Adversarial AI (CSE.555T)**, Teaching Assistant — *Washington University in Saint Louis*

## Outreach & Professional Development
